

Windows | Doors | Conservatories

Whatever your property type, personal style or budget you'll easily find the ideal window or door for you in the Inspire range.

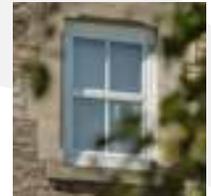

About Inspire

The right windows and doors can completely transform your home. Not only will fashionable frames and hardware add flair to your property, they'll allow you to relax in a more comfortable environment too.

Whether you live in a modern property, townhouse, cottage or high rise apartment, you will find the ideal product in the Inspire range.

Take a look through this brochure, see the styles and colours we have on offer and imagine some of them installed in your home – I'm sure you'll find a window and door that perfectly matches your individual taste.

Traditional or modern, we have the perfect window style for your home.

Inspire Casement Windows

Inspire casement windows are very versatile, complementing all styles of home with its simple design. They can be fixed (non-opening), opened from the top or opened from the side. And they can be combined to create different configurations including bay styles, giving you more freedom in design.

Inspire Tilt & Turn Windows

Tilt and turn windows tilt into a room from the top when open, providing natural ventilation for your home without compromising on security. They can also be fully opened inwards on a side hinge for full ventilation and to allow you to clean them easily from the inside.

Inspire Sash Windows

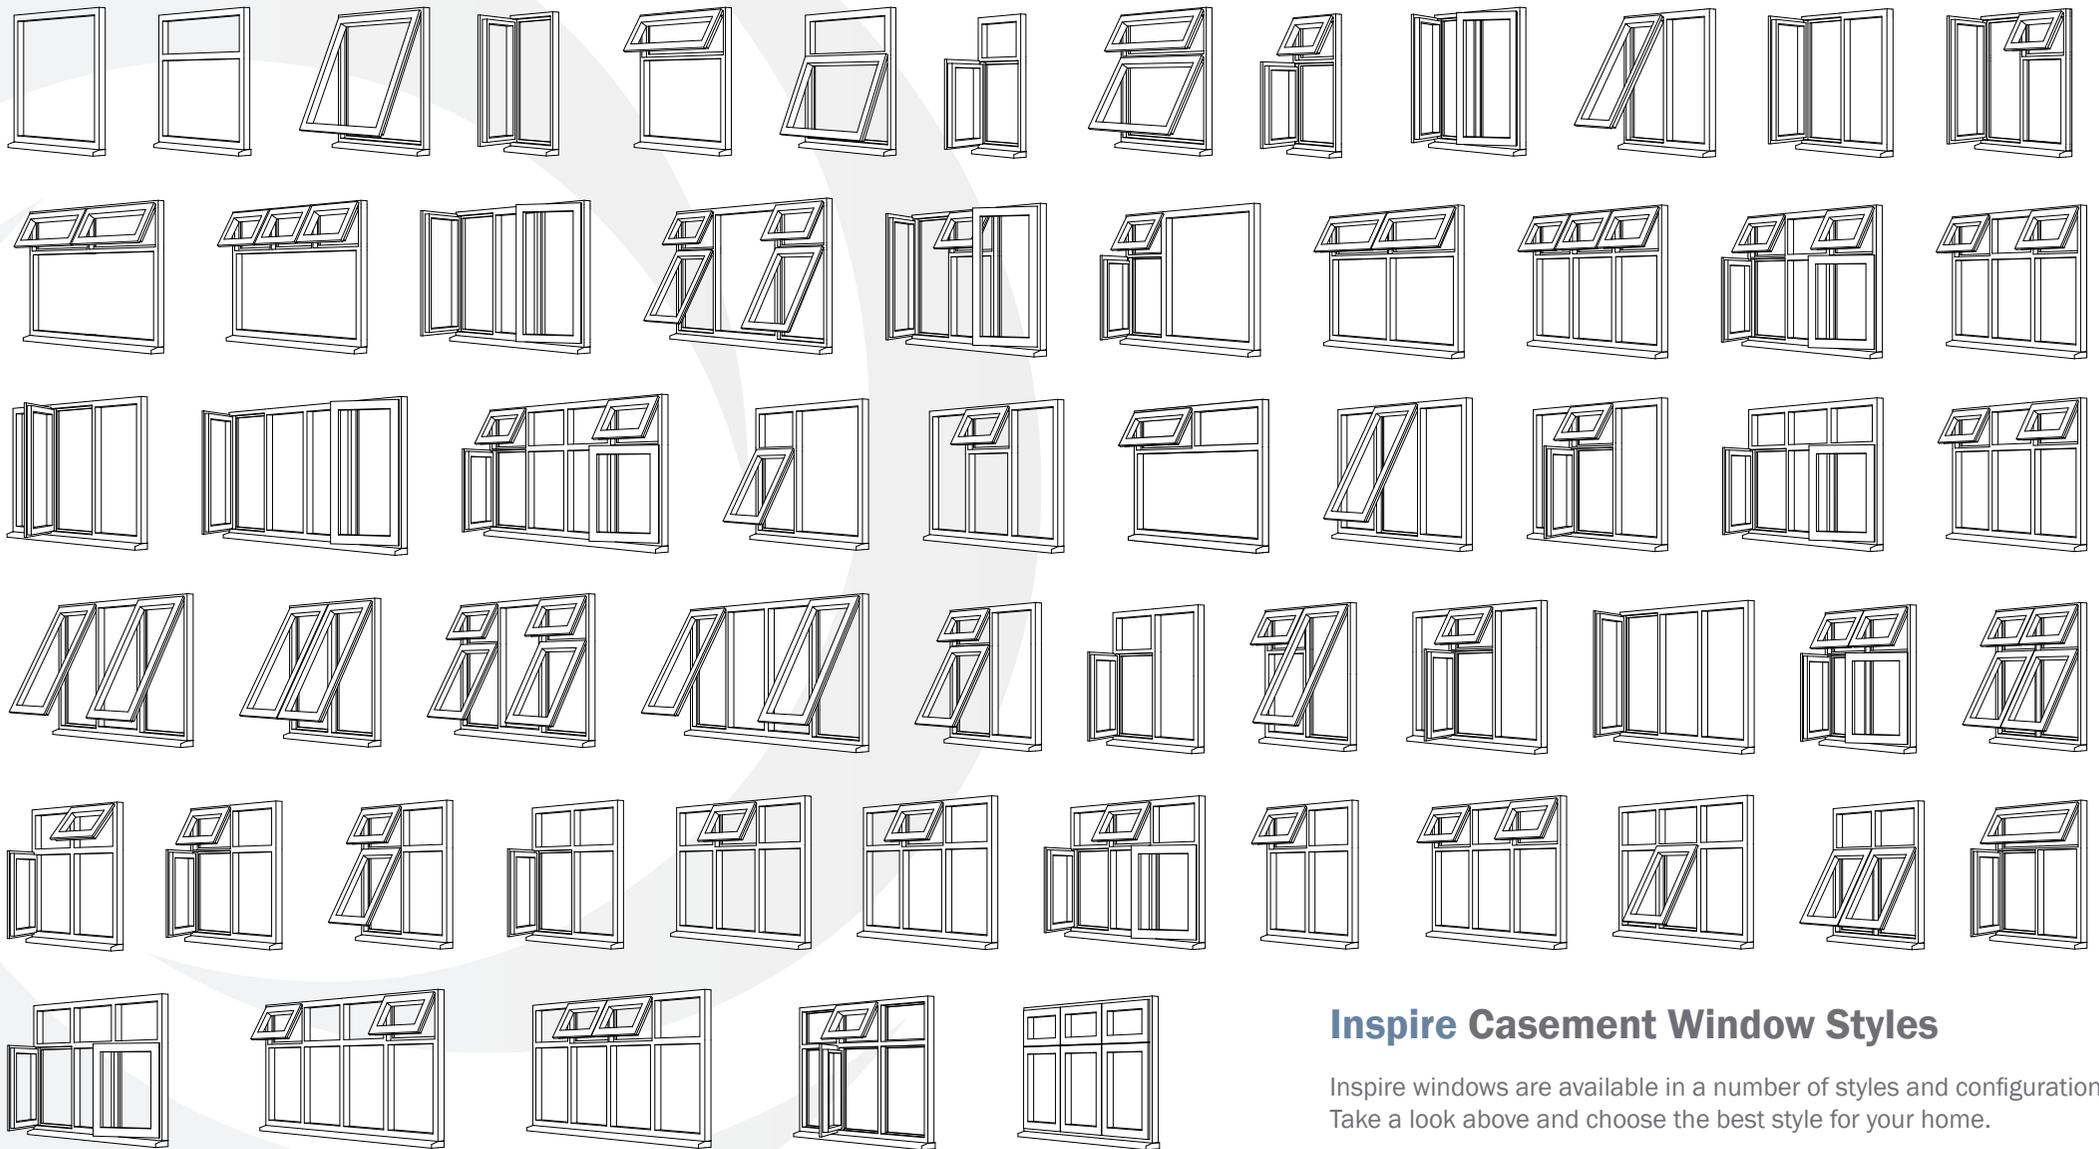

Do you live in a traditional property? Why not enjoy the aesthetics of a traditional timber box sash window for less cost with an Inspire PVCu sash window? These windows replicate the fine details of a timber vertical sliding sash window, but are less expensive and offer all the energy saving benefits and low maintenance of PVCu.

Inspire Casement Window Styles

Inspire windows are available in a number of styles and configurations. Take a look above and choose the best style for your home.

A photograph of a garden area. In the foreground, there are several large, rounded, green bushes. To the right, a brick building with a tiled roof and a blue-painted base is visible. In the middle ground, there is a lawn with a white fence and a wooden gate. A black lounge chair is positioned on the lawn. A black lamp post stands on the left side. The background is filled with tall, green evergreen trees.

Not only do they look stylish, Inspire entrance doors will keep intruders out and the worst of the British weather at bay.

Inspire Residential Doors

What does your door say about you? Your home's entrance is the first thing people notice. Ensure it makes the right impression with an Inspire entrance door. Brighten up a doorway or revive a tired old entrance with beautiful designs, fresh colours and stylish hardware.

A large number of style combinations lets you create your ideal look, from modern entryways to charming country exteriors.

Inspire French Doors

Timeless and elegant, French doors never go out of style and can be used to create a stunning entranceway to a garden or patio area. The Inspire French door uses a lot of glass, making your home brighter and more welcoming.

Inspire French doors are also brilliant at ventilating a home when it's hot, and when both doors are open a French door gives clear views to outside.

We offer a range of styles and colours, all of which match our Inspire windows for a truly consistent look.

Our classic French doors will enhance the look of any home.

Inspire In-line Patio Doors

Because they slide horizontally rather than open outwards, Patio doors are a practical and stylish choice if you have limited space in your home.

The Inspire patio door has passed the stringent 'Secured by Design' test, making it one of the most secure on the market today.

Inspire patio doors are available as a single sliding panel, but they can also go up to as many as two or three panels to create an impressive wide-span door which makes your home look bigger and brighter.

The Inspire In-line patio has passed the stringent Secured by Design test – keeping any would-be intruders at bay.*

Bi-folding doors are praised for bringing the outside in, seamlessly merging inside and outside to give the impression of a wider open space.

Inspire Aluminium Bi-folding Doors

Bi-folding doors are praised for bringing the outside in, seamlessly merging inside and outside to give the impression of a wider open space.

Inspire bi-folding doors are made from strong, slim-line aluminium frames. A thinner frame holds more glass which means better views to outside and a more illuminated home.

Inspire bi-folding doors can be enjoyed all year round. In summer push them back to let light and air into your home. And in winter enjoy the spectacular views to outside from the warmth and comfort of your home.

Colours

Aluminium bi-folding doors can be sprayed in any RAL colour – that's over 200 colours in gloss, semi-gloss and matt finishes!

If you're looking for something a bit more unique, we also offer dual-colours (different colours inside and outside), allowing you to really personalise your door.

A great alternative to PVCu entrance doors, composite doors give your home extra insulation, extra security and extra style.

Inspire Composite Doors

Composite doors are a great alternative to PVCu entrance doors, giving your home extra insulation, extra security and extra style.

The foam filled core of a composite provides excellent insulation for your home and the glass reinforced plastic (GRP) outer skin

protects the door from the elements and problems such as swelling or warping.

Inspire composite doors are very secure. Their strength makes them very hard to break into and with Secured by Design* accreditation you can rest easy knowing your home is safe.

Inspire Composite Door - Colours

So you've decided you want to go for a composite door and have chosen your favourite style – now you just need to select a colour. Inspire composite doors are available in a choice of modern and traditional colours so you can find the perfect door for your home.

The glass reinforced plastic (GRP) outer skin of the Inspire composite door has a timber-like graining to mimic the look of real wood. For a striking look choose a rich colour such as Red or Blue or for something a little more authentic go for Golden Oak or Rosewood.

Best of all, because of the GRP skin, the door is easily maintained, keeping your entrance looking fresh year after year with minimal effort required.

Inspire Window Hardware Options

The finishing touch for your new windows is the handles. Choose from lots of different finishes to complement the colour scheme of your home or to create a focal feature of the window.

Peardrop & Teardrop Handles

The Peardrop and Teardrop are two attractive types of handle. They give a traditional appearance to your windows and make an interesting style detail that looks good in all types of home.

Monkey Tail Handles

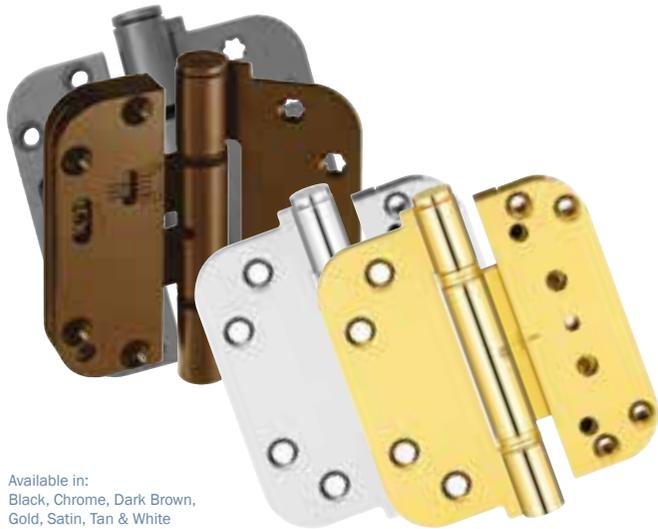

First seen on the original timber windows of yesteryear, monkey tail handles are an easy way to add a traditional vibe to modern windows. Combine with a woodgrain effect foil to get a true original timber window look.

Inspire Colour Options

Colour can be used to inject personality into your property, complement existing colour schemes or make a bold style statement. Give traditional properties a subtle style boost with pastel shades and wood effect foils, or if you live in a more modern house go for striking monochrome or daring brights.

With Inspire you have two different ways to colour – wood effect foils or the Inspire Heritage Colour Collection. These are designed to give uPVC the appearance of natural timber, perfect if you want wooden windows without the maintenance issues.

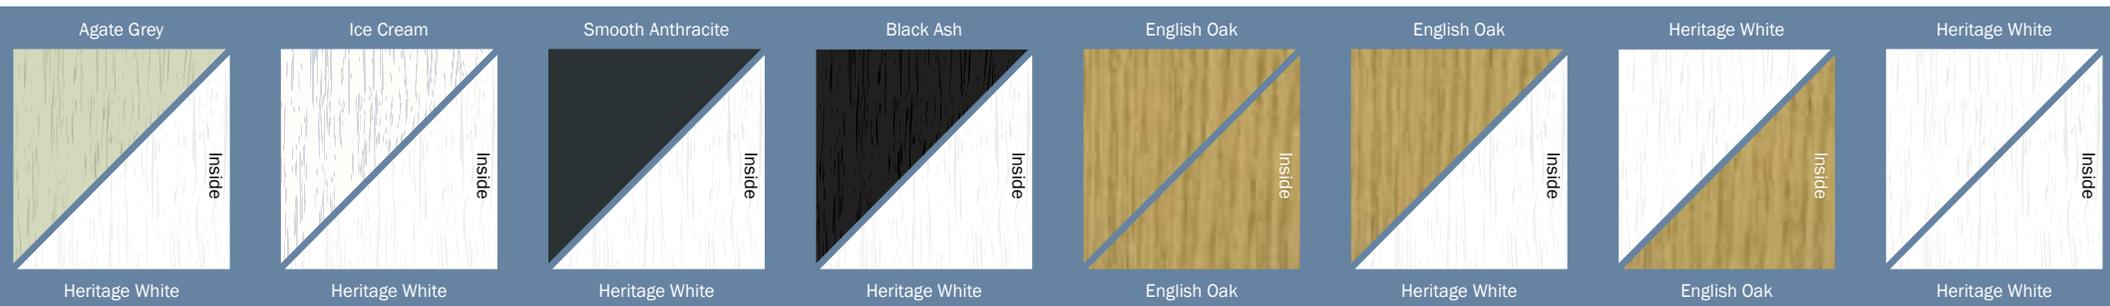

Woodgrain Foils

Inspire Heritage Colour Collection

The Inspire Heritage Colour Collection is a premium range of woodgrain colour foils. The collection is designed to offer the authentic look of painted timber, in popular heritage shades, but with a durable and low-maintenance finish.

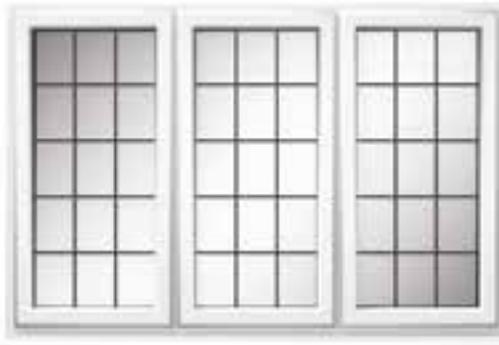

Choose from six external colours on Heritage white as standard, or the same colour on both sides in the English Oak and Heritage White options. The Inspire Heritage Colour Collection is available exclusively for Inspire windows and doors manufactured using the 2800 Decorative profile.

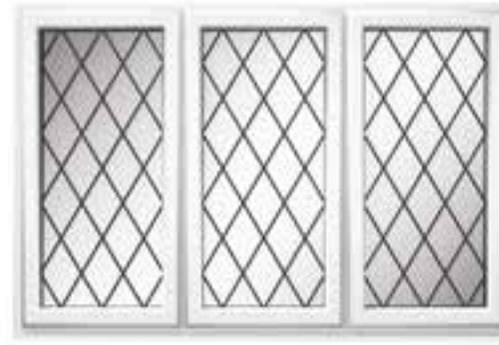

Choose from a selection of woodgrain foils or Heritage range for an authentic traditional timber appearance in your home.

Inspire Leaded Glass and Astragal Bars

If you live in a traditional property or simply like the decorative features on older style windows, take a look at our three decorative glass options – leaded glass, internal Georgian bars and external Georgian (or astragal) bars.

Leaded glass has been popular for centuries and adds real artistic quality to any window. Inspire windows can have a square leaded or diamond leaded design depending on your preference.

Inspire internal Georgian bars are encased within the glass unit, whereas external Georgian (or astragal) bars are planted on the outside of the glass unit. Astragal bars were commonly found on 19th century windows and are experiencing something of a revival in the 21st century as modern homeowners look to create the same traditional aesthetic.

Give your home a truly traditional look with the Inspire range of leaded glass or astragal bars.

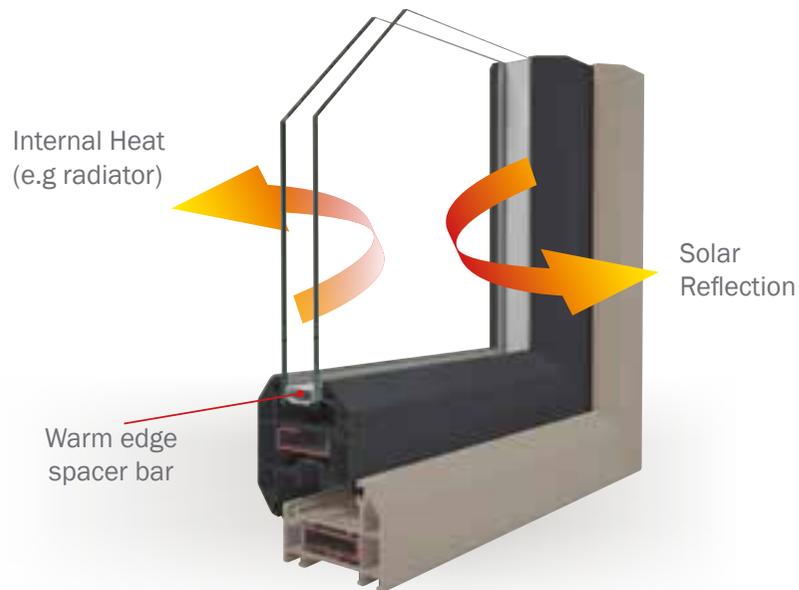

Energy Efficiency

Wouldn't it be nice to save a little extra on your heating bills every year? Upgrading to energy efficient Inspire windows and doors helps reduce heat loss from your home. This means you won't have to have your heating turned up as high, or for as long, during the colder months, saving you money on your energy bills.

Not only do you save money, but you also help save the environment as a reduction in fuel usage goes towards minimising your carbon footprint.

PVCu is a naturally good insulator and Inspire window frames have multiple chambers to improve this further. Inspire windows and doors also contain energy efficient glass, which helps keep the warm in and the cold out.

Our windows are available with an 'A' rating – the highest possible energy efficiency standard.

Inspire Glass Options

Inspire windows and doors are available with a wide variety of glass options. We won't list every option here – your sales representative will be able to advise the best solution for you – but here's a brief summary of what we can offer.

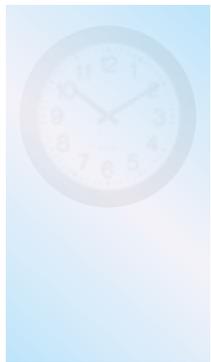

Energy efficient glass

Our double glazed units are incredibly energy efficient. The outer pane of glass allows more sunlight and heat to enter through your windows and into your house. The inner pane meanwhile functions primarily to stop heat escaping through your windows and helps to retain heat in your home. Our glass units also use a warm edge spacer bar, which is

the component that separates the two panes of glass. This prevents cold air entering the house and stops mould and condensation forming – far better than the aluminium spacer bars found in many glass units.

Decorative

Decorative glass is used to maintain privacy in your house, for example in a bathroom. It can also provide an alternative to blinds or curtains if your house is overlooked or your windows are near a main street where people could see in. Patterns can be as simple as ripple effects or intricate floral designs; whether you prefer minimalistic or fancy styling there's a glass to suit every taste.

* Triple glazing is not available with Astragal Bars

Inspire Triple glazing

The next generation of home improvements is here! Upgrade to triple glazing and you could be relaxing in a warmer, more secure home.

Inspire triple glazed PVCu windows* are designed to be very thermally efficient, helping to keep your home warmer, reduce your energy consumption, and even save you money on your heating bills.

The extra pane of glass makes triple glazing more secure too as it reduces the chances of a potential intruder being able to force entry to your home. As a result you can rest assured knowing you and your property are safe.

Most of the products in this brochure incorporate locks made by MACO, one the UK's leading lock manufacturers. Aside from offering incredible security, all windows and doors that have a MACO lock are backed by MACO Secure Plus, a comprehensive protection scheme that offers the following benefits:

£1,000 Excess Cover In the unlikely event that a break in occurs through failure of the hardware, MACO will refund your home contents insurance excess up to £1,000.

10 Year Guarantee Every MACO product is guaranteed for 10 years with the unique MACO Secure Plus repair or replace policy.

24hr Emergency Lock Breakdown You'll be covered by a 24 hour Emergency Lock Breakdown Service normally with you within 2-4 hours. So you can sleep easy knowing we'll be there, to make your home secure any time of the day or night come rain or shine.

Secure Key Holder Service As a MACO customer you can have access to an optional Secure Key Holding Service. Should you forget or lose your keys then entry into your property can be almost impossible. Rather than engaging an expensive and often damaging locksmith, we can let you back in again, any time of the day or night.

Alarm Response Service In addition you can register for our Alarm Response Service that can quickly respond and rectify any problems encountered at your property whilst you are away from home or on holiday.

Lost Key Return Service In the event that your lost keys are found and returned, the finder receives a £10 reward paid by us.

Every MACO lock is guaranteed for 10 years and in the unlikely event of a break in MACO will refund your home content insurance excess up to £1,000.
